

MIMIC

Medical Instruments Manufacturing: from Idea to Clinic

MedTech innovation is challenging for technical, clinical and business reasons

MIMIC is a Medical Delta-funded program to improve the innovation process of medical devices, contributing to a sustainable healthcare system

Goal and Scope

- Build a program of activities in support of the innovation process of medical devices
- Scope: Research – Development – Small series for clinical validation
- Primary focus on (active) invasive devices

Program

- Define and provide an innovation roadmap
- Collect and provide templates, procedures and best practices to support innovators from research to clinical validation
- Establish an expert network
- Knowledge matchmaking
- Organize infrastructure
- Establish research programs

Parties involved in developing **MIMIC**

MIMIC lead team

Marcel Tichem, Gaby Offermans,
TU Delft
Ronald van Gils
Hogeschool Rotterdam
